

## 24/7 Solid Anti Fatigue Mat Tiles

24/7 Solid Anti Fatigue Mat Tiles are a comprehensive interlocking comfort floor mat system. The solid surface provides extra cushioning and support for employees who are on their feet for long periods, and makes clean-up easy. Available in General Purpose, Cutting-Fluid resistant and Nitrile formulations. Mats are highly customizable, and feature a hidden fastening system for ease of movement and reconfiguration. 5/8" thick for excellent cushioning properties.

**Grease Resistant (GP)** mats are grease and water resistant, and useful in all general purpose settings where anti-fatigue properties are desired.

**Cutting-Fluid Resistant (CFR)** floor mats resist mineral oil-based cutting, threading and machining fluids commonly used in manufacturing and repair.

**Nitrile Rubber (NBR)** mats are made from a nitrile rubber compound specifically formulated to resist petroleum-based fluids that make ordinary rubber mats to rot, swell and disintegrate.

**ToughGrit** traction surface available on CFR and NBR mats. Safety ramps available in black and safety yellow.
