Circular Disk Interlocking Garage Floor Tiles

Circular Disk Interlocking Garage Floor Tiles add beauty and value to any garage floor while reducing slips and falls by improving traction and ease of cleaning.

These garage floor tiles easily snap together without any needing any tools. Simply interlock each these garage tiles to cover large wall-to-wall garage spaces and non-rectangular floors.

Circular Disk Garage Tiles not only have visual appeal and help hide unsightly floor stains and cracks but also make your garage floors safer thanks to their textured surface, which increases slip-resistance on floors that are wet and slippery due to rain, snow, debris and engine fluids.

Each 1' x 1' x 1/2" interlocking tile is made of an industrial grade PVC compound that can support over 50,000lbs each.

1' long x 3" deep beveled reducer edges are available which connect to the garage floor tiles to provide a smoother transition between the garage floor and the garage tiles.
