

Diamond Plate Vinyl Runners

Diamond Plate Vinyl Runners are constructed of 1/8" thick vinyl matting and boast a raised diamond pattern for greater traction and a classic industrial look.

These durable vinyl runner mats are available with an OSHA approved yellow safety edge for high visibility in addition to the two standard vinyl runner colors.

Diamond Plate Runners are often used in heavy-duty commercial environments to increase traction, direct traffic and warn individuals about potential safety hazards. This vinyl runner can be used in warehouses, long corridors and entryways and manufacturing plants.

Thanks to its sturdy 100% vinyl construction, these runner mats are designed to withstand most chemicals and cleaning agents while resisting curling and shrinking.

Diamond Plate Vinyl Runners are 3/16" thick and can be manufactured in lengths up to 75' long.

Environmental Green Rating: 100% Recycled Content.
