## DiamondPlate Interlocking Garage Floor Tiles

DiamondPlate Interlocking Garage Floor Tiles are a great way to enhance the appearance of your garage while boosting safety by adding traction to the garage floor.

These interlocking garage floor tiles easily snap together to form a sleek, seamless wall-to-wall in your garage - there are no tools required! Interlocking tiles are ideal for oversized areas and non-rectangular garage floors.

The diamond deckplate design of these garage tiles helps prevent slips and falls, especially on floors that become wet and slippery from snow, rain, salts, debris and engine fluids.

DiamondPlate Garage Floor Tiles are manufactured from virtually indestructible PVC which is designed to withstand constant vehicular presence.

Each garage tile is 1' x 1' x 1/2" thick and snap together with other tiles and/or beveled edging on each side.

1' long x 3" deep beveled edge reducers are available to help transition from non-tiles garage floor areas to the interlocking garage tiles.

Item No: FM-PDDPIT
