

## Textured Rubber Runners

Textured Rubber Runners offer the superb traction and slip resistance of a premium rubber mat and have a multi-directional surface pattern.

These rubber runner mats work well for directing foot traffic and protecting floors (such as during a school sporting event) as well as shelves (from erosion from stored chemicals).

Available 3/32" thick and in lengths up to 150' long, Textured Rubber Runner Mats are our thinnest and lightest runner matting but still hold up well in commercial-environments.

Textured rubber runners are constructed from 100% EPDM rubber, which gives these runner mats better durability and a longer life and is best for wet, slippery areas where increased traction is needed.

Environmental Green Rating: 33% Recycled Content
